

JOB TITLE & EXPERIENCE

Software Development Engineer - (SDE - I)

JOB BRIEF

We are looking for a passionate Software Development Engineer to develop, test, maintain and document in accordance to user requirements and system technical specifications. As a Software Development Engineer, you will work with other Developers and Product Managers throughout the software development life cycle.

Software Development Engineer responsibilities include analysing requirements, define system functionality and writing code in the company's current technology stack. The candidate is expected to be familiar with the software development life cycle (SDLC) process from preliminary system analysis to tests and deployment. Ultimately, the role of the Software Engineer is to build high-quality, innovative and fully performing software that complies with coding standards and technical design. Your goal will be to build efficient programs and systems that serve user needs.

To be qualified for this role, you should hold a minimum of bachelor's degree in a relevant field, like Computer Science, IT or Software Engineering. Other disciplines shall be considered for exceptional candidates. You should be a team player with a keen eye for detailed and problem-solving skills.

JOB RESPONSIBILITIES

- Work with developers to implement algorithms and flowcharts
- Produce clean, efficient code based on specifications
- Verify and deploy programs and systems
- Troubleshoot, debug and upgrade existing software
- Create technical documentation for reference and reporting
- Develop software verification plans and quality assurance procedures
- Good interpersonal and technology understanding skills
- Document and maintain software functionality

JOB REQUIREMENTS

- Knowledge of enterprise programming languages like Java, Scala.
- Knowledge of scripting languages like Python, JavaScript
- Web frameworks like Play, Apache
- Experience with databases like MySQL, PGSQL, MSSQL
- Exposure to REST API, Containers and Cloud implementation.
- Ability to learn new languages and technologies
- Excellent communication skills
- Demonstrable ability to discover and fix errors in code
